Summary

Aspiring Flutter Developer with a solid understanding of mobile app development fundamentals. Proficient in Dart and the Flutter framework, with hands-on practice in building responsive layouts, debugging, and API integration. Enthusiastic about applying creativity and technical skills to develop scalable, high-quality applications.

Experience

Flutter Developer Intern

Luminar Technolab

Kochi, Kerala

Aug 2024 – Present

- Designed and developed responsive, cross-platform mobile applications using Flutter and Dart.
- Experienced in creating responsive UI designs and implementing state management solutions (e.g., Provider, Bloc, GetX, Riverpod).
- Skilled in API integration, debugging, and optimizing app performance.
- Passionate about learning new technologies and improving mobile app development skills.

Education

Mahatma Gandhi University, Kerala

BCA in Computer Science

Jun 2021 – Mar 2024

Projects

Blood Donation App [Link]

- Developed a simple blood donation mobile application using Flutter, focusing on core functionalities and usability.
- Designed and implemented local database storage using SQLite (or relevant local database) to maintain user information and donation requests.
- Gained experience in Flutter widget development, local database management, and debugging.

Photo Sharing App (Snap Share) [Link]

- Developed a photo-sharing and story-sharing mobile application using Flutter, enabling users to easily share images and stories with multiple people.
- TCreated an intuitive UI/UX for photo upload, story sharing, and interaction features, enhancing user engagement.
